Station de recharge Tuvalu New Energy

H ow TEC is powering T uvalu with renewable resources?

TEC has set a vision of â€œP owering T uvalu with R enewable R esources" and this align well with the T uvalu G overnment set target of 100% renewable energy by 2025.
A ll the islands of T uvalu are on 24/7 power supply and the access rate is 100%.
T he outer islands are powered by hybrid solar PV system with diesel generator on standby.

W hat is the T uvalu national energy policy (TNEP)?

T he T uvalu N ational E nergy P olicy (TNEP) was formulated in 2009, and the E nergy S trategic A ction P landefines and directs current and future energy developments so that T uvalu can achieve the ambitious target of 100% renewable energy for power generation by 2020.

W ill T uvalu achieve 100% renewables by 2030?

T he pacific island nation of T uvalu is on track to achieving its goal of 100% renewables by 2030, with the recent commissioning of a 500 k W rooftop solar project and 2 MW h battery energy storage system in it's capital F unafuti.

W hat is the T uvalu solar power project?

T he G overnment of T uvalu worked with the e8 group to develop the T uvalu S olar P ower P roject, which is a 40 k W grid-connected solar systemthat is intended to provide about 5% of F unafuti 's peak demand, and 3% of the T uvalu E lectricity C orporation's annual household consumption.

W here does T uvalu electricity come from?

T uvalu's power has come from electricity generation facilities that use imported dieselbrought in by ships.
T he T uvalu E lectricity C orporation (TEC) on the main island of F unafuti operates the large power station (2000 k W).

C an T uvalu save money on diesel?

T he 191k W p project will provide the islands with 24 hours-a-day electricity and allow T uvalu to save up to 120, 000 litres of diesel per year, which will amount to a reduction in spending on diesel of about AU$200, 000 per year.
