What is battery energy storage systems (BESS)?

Vietnam is at the forefront of a transformative shift towards renewable energy, with Battery Energy Storage Systems (BESS) emerging as a cornerstone technology in ensuring grid stability.

BESS's ability to store excess electricity and release it as needed addresses the inherent variability of renewable sources such as wind and solar power.

How much power will Vietnam have by 2030?

The plan also called for 300MW of battery storage deployment and 2,400MW of pumped hydro energy storage (PHES) by 2030.

State-owned public power company Vietnam Electricity (VE), is participating in a 50MW/50 MW h grid-scale BESS pilot project which marks a first step towards that BESS goal.

How can BESS help Vietnam achieve energy transition objectives?

Beyond grid stabilization, BESS plays a pivotal role in advancing Vietnam's energy transition objectives.

By effectively managing energy supply and demand, BESS contributes significantly to achieving targets for renewable energy adoption and diminishing reliance on fossil fuels.
